

# TerraData

## Highlights 2006-2016

# Milestones

- 2006.** TerraData foundation. Alessandro Chiarucci nominated President.
- 2006.** First scientific meeting organized.
- 2007.** First ISI paper with TerraData affiliation published.
- 2009.** Luisa Frati nominated new President.
- 2010.** New office opened.
- 2013.** First international book edited.
- 2014.** First 1M€ of total projects reached.
- 2015.** Officially registered as Research Agency. Research agreement with Foundation Edmund Mach signed.
- 2016** Ten years.

*From top to bottom: TerraData founders in 2006; past President Alessandro Chiarucci signs the official Act of TerraData, 12 April 2006; the first paper published with TerraData affiliation; President Luisa Frati signs the Research Agreement with Foundation Edmund Mach.*

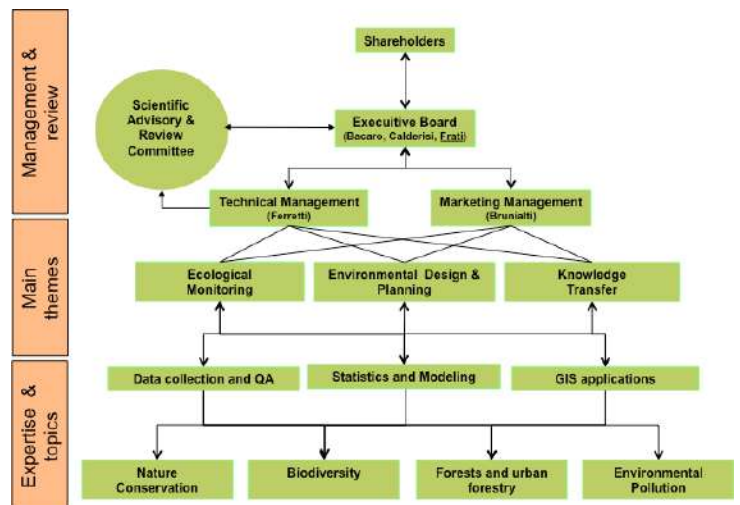

# Our team and organization

Our organization is based on the contribution of shareholders, partner scientists, and staff members.

Shareholders include investigators 100% involved with TerraData activities, as well as researchers and University professors. They provide scientific advice and review.

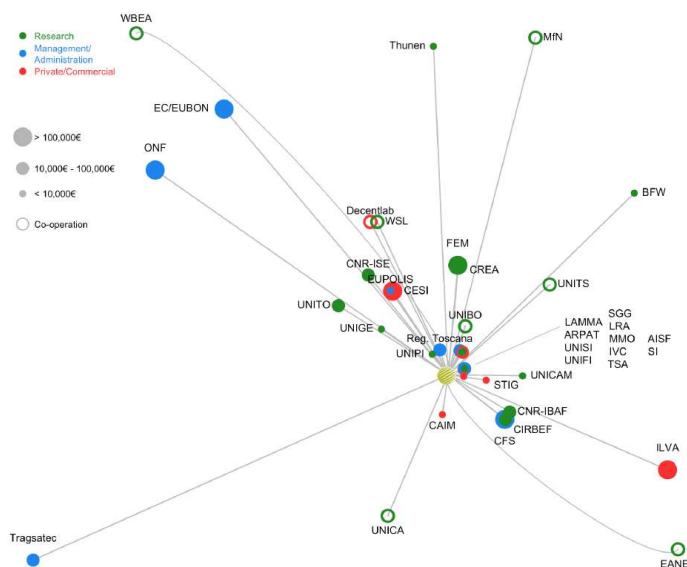

Partner scientists co-operate with TerraData on specific projects.

The whole team is organized as described in the figure: our main themes are addressed according to our expertise and in relation to several topics and endpoints.

# Our network

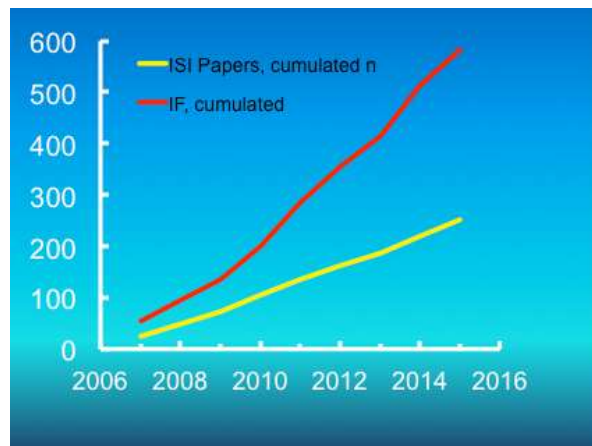

Our network of business and research partners involves local, national, and international organizations from industry, services, university, public administration and research bodies, including the European Commission and the International Co-operative Programme on Assessment and Monitoring of Air Pollution Effects on Forests (ICP Forests).

# Scientific performance

## Publications

TerraData shareholders published some 253 papers on ISI journals between 2007 and 2015, with a cumulated Impact Factor (IF) of 583. The mean H Index in 2016 was 15.5 (min: 7; max: 25). Citing articles (without self-citation) were 693 (161-1634).

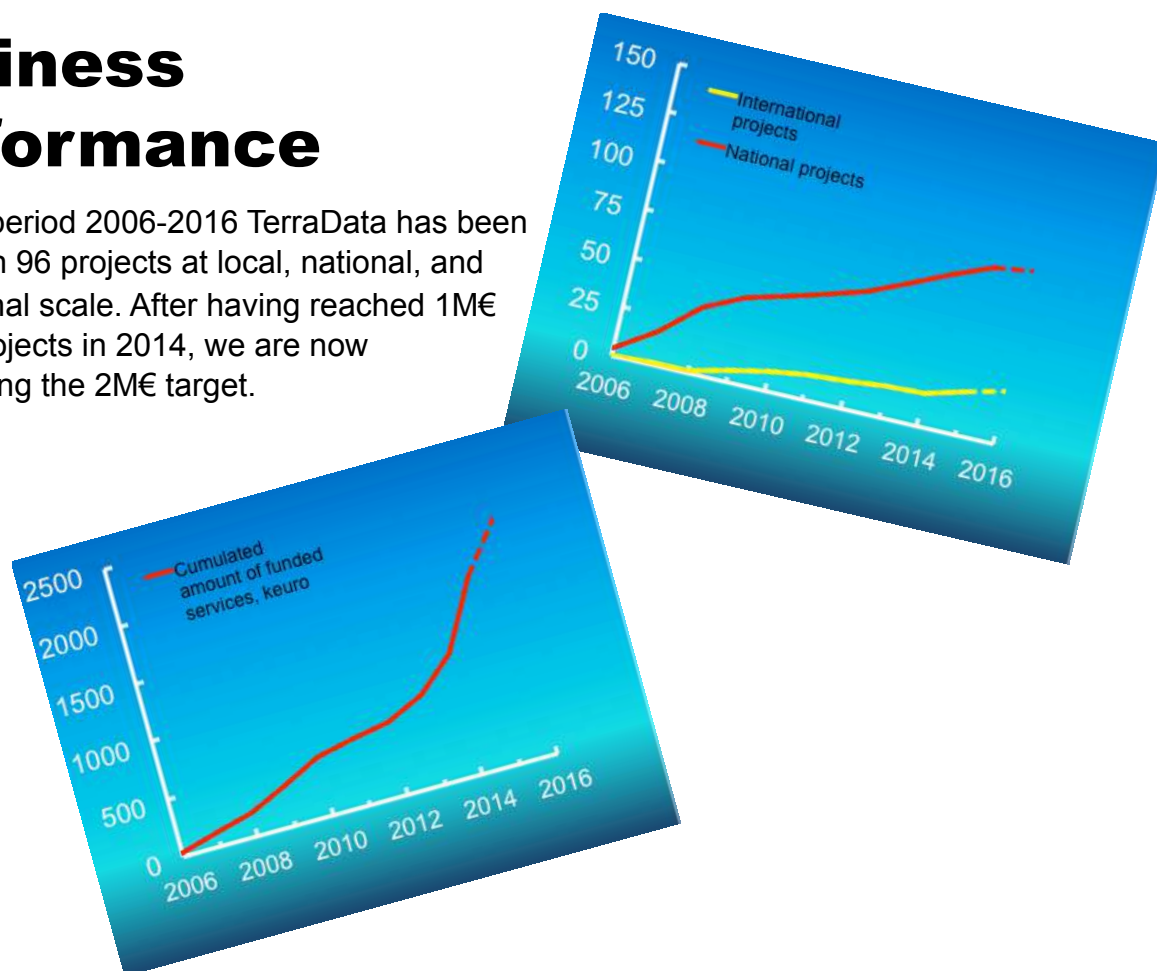

## Events

TerraData organized, co-organized and attended dozens of scientific events worldwide. TerraData has been co-organizing the Scientific Conferences of the ICP Forests since 2011. Several reports and Special Issues on international journals were published after these initiatives.

# Business performance

Over the period 2006-2016 TerraData has been involved in 96 projects at local, national, and international scale. After having reached 1M€ of total projects in 2014, we are now approaching the 2M€ target.

## Outlook

Multi-annual national/international projects are being implemented; others are just starting; and others are being designed in co-operation with our partner scientists in Italy and abroad. Several scientific initiatives (events, papers) are in the pipeline. We are approaching the next years with solid basis and many ideas!
